State of Maryland Mosquito Control Program

The City of New Carrollton is participating in the State of Maryland's Mosquito Control Program. Over the summer the State will be monitoring mosquito counts throughout the City and spraying as appropriate. Spraying will occur in the City on Thursday evenings when the mosquito count justifies it.

There has been some concern voiced to the State from Prince George's County residents regarding the mosquito spray being used. To clarify, the pesticide used is a truck-based spray called Permanone 30-30, which is permethrin-based. There has been some concern voiced about the use of the pesticide Naled. We have been assured by the State Department of Agriculture Mosquito Control Program does not spray Naled anywhere in Prince George's County. For more information please call the Department of Agriculture Mosquito Control Program directly at 410-841-5870.

Smoke Detectors Save Lives:

The majority of fatal home fires happen at night, when people are asleep.

Contrary to popular belief, the smell of smoke may not awaken a sleeping person. The poisonous gases and smoke produced by a fire can numb the senses and put you into a deeper sleep.

Inexpensive household smoke detectors sound an alarm alerting you to a fire by giving you time to escape. Smoke detectors cut your risk of dying in a home fire nearly in half.

Is One Smoke Detector Enough: Every home should have a smoke detector outside of every sleeping area and on every level of the home, including the basement.

Fire and building codes also require a smoke detector in every bedroom for new construction. On floors without bedrooms, detectors should be installed in or near living areas, such as dens, living rooms, or family rooms.

Wall mounted units should be installed so that the top of the detector is 4 to 12 inches from the ceiling. A ceiling mounted detector should be installed at least four inches from the nearest wall. In a room with a pitched ceiling, mount the detector at or near the ceilings highest point.

Enforcement is located in the
